About Magnimage

Shenzhen Magnimage Technology Co., Ltd, was founded in 2010, located in TCL International E City ,Nanshan, Shenzhen. It's a high technology company which is dedicated in the development, manufacturing and sales of LED/LCD/DLP large screen display control field equipment. Our products are designed for live event, conference, publicity, surveillance center, etc.

With the strong and experienced technical staff, we have great market reputation for video processor, switcher, video wall controller and accessories. These products have all passed CCC, CE, FCC, RoHS, and KC certificates and awarded the National High-Tech Enterprise.

We keep elevating ourselves and products to meet the market demand. With persistent efforts in technical innovation, we are confident to support clients in different applications.

Born for large LED screen

Magnimage LED video processors are developed for large LED screen display system, there are Numerous models of processor wildly use in stage rental, radio and television systems, variety show, product release, commercial applications, wedding etiquette and so on.

Magnimage using the industry's top image processing chip, advanced motion picture adaptive processing technology, it can eliminate the video image movement trailing and sawtooth, makes the image details clearer and richer in color. With advanced image scaling technology and strong capacity, Magnimage video processors are several times better than ordinary video processors, which support customize input / output resolution, EDID management and simple splicing, can cascade with same model products, to realize big resolution splicing easily.

Integrated numerous professional input ports, like DVI, HDMI, DP and SDI (loop) etc. which support VGA, DVI, SDI, DP expansion ports, support network, USB and RS232 serial for conveniently control among multiple video equipment.

LED-780H series

4 screens mosaic by 1 processor, 9 million pixels
4 windows output, support 4 independent signals
Output monitoring(optional)
Mixed matrix input, seamless switching between 8 outputs
Preview switching
Customize input/output resolution

Multiple cascade
Rotary output
Genlock output and loop
Save and load presets
Extendable input signal
Low latency (16ms@60Hz)

LED-783H

4 screens mosaic by 1 processor, 9 million pixels
4 windows output, support 4 independent signals
Output monitoring
Mixed matrix input, seamless switching between 8 outputs
Preview switching
Customize input/output resolution

Multiple cascade
Rotary output
Genlock output and loop
Save and load presets
Extendable input signal
Low latency (16ms@60Hz)

LED-580F series

4K input/output

Customize input/output resolution

Support DP input/output

Support PIP/POP

Support extended input/output port

2 screens mosaic by 1 processor, support multiple cascade

Preview switching

4 audio inputs (including 1 HDMI)

Support SDI input/output(optional)

LED-572E series

4K input/output

Customize input/output resolution

Support DP input/output

Support PIP/POP

Support extended input/output port

2 screens mosaic by 1 processor, support multiple cascade

Preview switching

Built in 4 sending card slots

Support SDI input/output(optional)

LED-550D series

Seamless mosaic

Fade in/out

Input signal hot backup

Customize DVI input resolution

Customize output resolution

Dual Channel image crop

Dual image

Multiple cascade

SDI input(optional)

LED-760H series

4 screens mosaic by 1 processor, 9 million pixels

4 windows output, support 4 independent signals

Mixed matrix input, seamless switching between 7 outputs

Preview switching

Customize input/output resolution

Multiple cascade

Rotary output

Save and load presets

Extendable input signal

Low latency (16ms@60Hz)

LED-500C series

Seamless mosaic

Dual image

Fade in/out

Multi-template application

Input signal hot backup

Accurate brightness control

RS232 control

SDI input(optional)

LED-500B

Image crop

Part/full screen

Image freeze

Two sending card

Multi-template application

DVI enhancement technology

Zoom function

The King of video and image mosaic

Cyclone video wall controller is a high-performance image processing device with pure hardware architecture, which is specially designed for LED video wall with small pixel pitch. Cyclone video wall controller can realize seamless splicing and multi-layers functions, and it can be used in security monitoring, administration, military, exhibition, research and education. Cyclone video wall controller adopts hardware architecture on basis of high speed and capable FPGA array, and digital bus matrix. For all kinds of inputs sources, cyclone series video wall controller ensures original signal recovery by adopting RGB 24bits/60Hz internal processors, ensures high quality image output without delay and supports seamless splicing for multi-screens outputs by using a built-in-high-performance image scaling engine. It adopts dual-DVI copy output, one DVI is for screen, another DVI is for monitor, or two outputs to sending card together, support sending cards cascade. custom output resolution, adopting to a variety of LED screen resolution to achieve pixel to pixel mosaic display. It supports different pixel pitch LED mosaic at the same time. All output ports can be built-in pixel to pixel display of HD background.

MIG-CL9000 series

- FPGA hardware architecture

Support max 6 independent layers per output

Support splicing for over 8 times scaled

Support different pixel pitch LED screen splicing

Internal 24 bit RGB processing

60Hz real-time processing

Input signal EDID management

4k*2k inputs

Seamless switching

Layer grouping function
- Fade effect among any layers

9 mosaic windows per output (multi-preview)

Customize output resolution

Input/output preview

Support pixel to pixel display HD native background

Dual power for backup

Dual DVI output cards

Projector edge blending splicing

Live monitor of system operation

Real time monitor via TCP/IP

Technical parameters

Chassis type and specification

Type	MIG-CL9003-A	MIG-CL9004-A	MIG-CL9008-A	MIG-CL9014-A	MIG-CL9019-A

MIG-CL9000-INSDIVGA	SDI、VGA	SDI×2、VGA×2	SDI support 480i、576i、720p、1080i/p(3G SDI) VGA support VESA
Output card type			
MIG-CL9000-OUTDVI-A	DVI	2×2	1024×768/60Hz 1366×768/60Hz 1440×900/60Hz 1440×1440/60Hz 1280×1024/60Hz 1680×1050/60Hz 1600×1200/60Hz 1920×1080/60Hz 2560×816/60Hz
MIG-CL9000-OUTDVI-B	DVI	4×1	The user-defined output resolution is 2560 for maximum width or 2560 for maximum height
MIG-CL9000-OUTIP	IP	1	Real time IP monitoring

* It has FCC,CE,RoHS,CCC,KC and multiple certificates

Make wonderful video and image changing rapidly

Video switcher manufactured by MIG, designed to solve the problem of seamless switching in the process of video image display.

Video switcher adopts hardware architecture on basis of high speed and capable FPGA array, and digital bus matrix. Video switcher ensures original signal recovery by adopting RGB 24bits/60Hz internal processors, ensures high quality image output without delay and supports seamless splicing for multi-screens outputs by using a built-in-high-performance image scaling engine. When host works with console, it realizes multi-layer and multi-scene switching, backup etc function, and it is widely applied in auto show, conference products launching, and stage show etc events.

MIG-V4 series

Two main outputs splicing display (3840 x 1080@Hz)

1 main output, 1 multi-window preview

Main output support 4 layers and 1 HD background

Internal video matrix and up to 20 sources inputs

Support 20 input signals real-time preview

Support switching between 8 layers and 8 layers

Support HD native background capture

External synchronization and multi-machine cascade

Projector edge blending splicing

Work with MIG-H1 console

MIG-V2 series

One program output (1920x1080@60Hz)

One multi-window preview

Program output support 4 layers and 1 HD background

Support 12 mix video input sources

Capture function, support chroma key

Support genlock, multi-machine cascade

4 layer to 4 layer switch, various switch effects

Work together with MIG-H1/MIG-H2

MIG-H1

Work with V4 or V2

Each H1 control up most 9 sets V4 or V2 or mixed model of them

30 presets, seamless switching between multi-scenes

T-BAR switch and control

Support group control of multiple host switchers

MIG-H2

Work with 1 set or multiple sets of V2 machine

Each H2 control up most 9 sets V2 machine

24 presets, seamless switching between multi-scenes

T-BAR switch and control

support group control of multiple host switchers

MIG-630C series

1 program output, 2 preview output

Preview switch, fade in/out

3 layers

Support HD LOGO and load

Customize input source (DVI)

Support 12 analog/digital signal input (SDI optional)

Multi-Template calling, chroma Key

MIG-620C series

1 program output, 1 preview output

Preview switch, fade in/out

3 layers

Support HD LOGO and load

Customize input source (DVI)

Support 12 analog/digital signal input (SDI optional)

Multi-Template calling, chroma Key

Technical parameters

Input index		MIG-620C	MIG-630C	MIG-V4-E	MIG-V2-E
VGA		4	6	2	2
DVI		4	4	8	4
SDI		2*	2*	2	2
AV		2	6		
Output index					
PGA	VGA	1	1		
	DVI	1	1	2×2	1×2
PRW	VGA	1	2		
	DVI	1	2	2×2	1×2
Machine specification					
Power supply		100~240V AC 50/60Hz	100~240V AC 50/60Hz	100~240V AC 50/60Hz	100~240V AC 50/60Hz
Power consumption		75W	80W	260W	160W
Operation temperature		0~45℃	0~45℃	0~45℃	0~45℃
Product dimension		482.0×401.2×88.5mm	482.0×402.0×133.4mm	482.6×371.0×177.0mm	482.0×371.0×133.0mm
Net weight		6.3Kg	5.7Kg	14.6Kg	12.6Kg
Explanation				V4 standard configuration is 12 inputs (selected), the maximum extended can be 20	V2 standard configuration is 8 inputs (selected), the maximum extended can be 12
Product certificate		FCC、CE、RoHS、CCC	FCC、CE、RoHS、CCC	FCC、CE、RoHS、CCC	FCC、CE、RoHS、CCC

Provide perfect video solution

We provide various accessories including video converter, splitter, fiber extender, sending card box ect. Combined using with different kinds of video equipment, providing you the perfect video control solution and the best video play effect.

Monitor MIG-2521

140° /120° wide viewing angle

VGA、DVI、AV multi-input and loop out

High brightness 400cd/m²

High contrast 500:1

Monitor MIG-2522

178° /178° wide viewing angle

AV、YPbPr、SDI、HDMI multi-input and loop out

High brightness 400cd/m²

High contrast 800:1

TALLY port

Format Converter MIG-2134

One SDI input convert to one HDMI output, with one SDI loop out
 One HDMI input convert to two SDI output (two SDI signals are copy mode)
 Built-in audio transmission

Format Converter MIG-2123

Support any DVI input resolution
 Various SDI resolution output
 Audio input, built-in SDI output

Format Converter MIG-2132

Various SDI input resolution
 Various DVI output resolution (optional)
 Audio output

DVI Splitter MIG-224/228

2 DVI input, 4/8 DVI output

Support EDID Management (DVI, HDMI, Study mode)

Automatic signal backup

Upper computer operation

Nondestructive cascade

LCD screen display

Button operation

Support HDCP

DVI Splitter MIG-214/218

2 DVI input, 4/8 DVI output

EDID management

Automatic signal backup

Support HDCP

Upper computer operation

Sending Box MIG-232L

Built-in two sending cards

Sending Box MIG-239L

Built-in 9 sending cards
Convenient to connect with video processor
